

Project Management Solutions

As a champion of rigid project management principles, INTEGRITY Engineers and Constructors implements proven processes with its expertise to address your ability to successfully execute small and large capital projects, cost/schedule, and performance criteria.

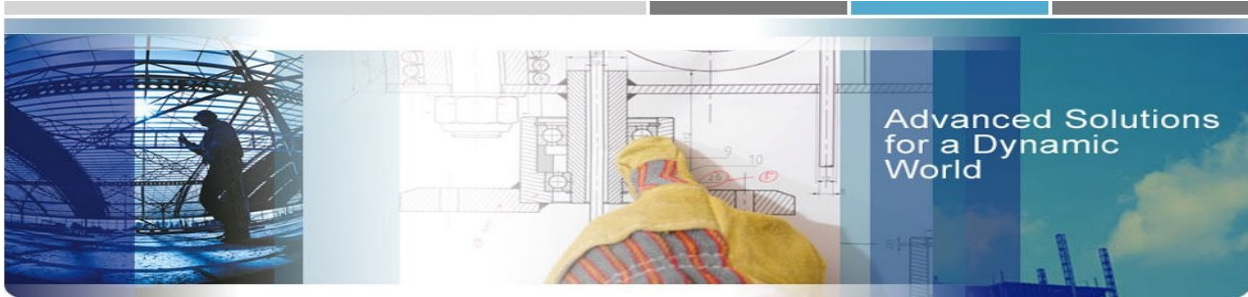

Conquering Your Challenges

Project management issues require diligent and innovative strategic assessments. Solutions must be uniquely suited to each individual client's requirements and business model. INTEGRITY's multi-industry project management/construction experience allows its personnel to provide customized solutions by leveraging this shared expertise. Our strengths include:

- **Management depth throughout project lifecycle** — At INTEGRITY, we work with you to provide a detailed scope, schedule, and project estimate for your project needs. Our expertise does not stop at process/plant commissioning, but continues into integration with your business enterprise systems.
- **Independent Verification and Validation of project's methods to meet SOW** — INTEGRITY combines proven, leading practices and extensive industry experience with a thorough investigation of your existing knowledge base and specific business requirements to assure timely delivery of a complete solution.
- **Qualitative evaluation of Project's cash flow forecasts, cost of capital, ROI** — Our Project Management Institute (PMI) PMBOK-based project execution methodology, combined with our experienced project teams, delivers a proven, quality stringent compliance with client specifications, schedule and budget for single- or multi-site technology rollouts.
- **Evaluation of Quality standards and guidelines for Individual project needs** — Proven project quality standards assure project completed on-time and within budget.
