

Process Instrument/Controls Systems Solutions

As an innovative controls services provider, INTEGRITY Engineers and Constructors supplies a diverse portfolio of instrumentation/controls solutions to clients/partners, adding business value and operational effectiveness to their processes. INTEGRITY offers independent, scalable, and cost effective technology deliverables that provides the correct technology for both domestic and international clientele.

Conquering Your Challenges

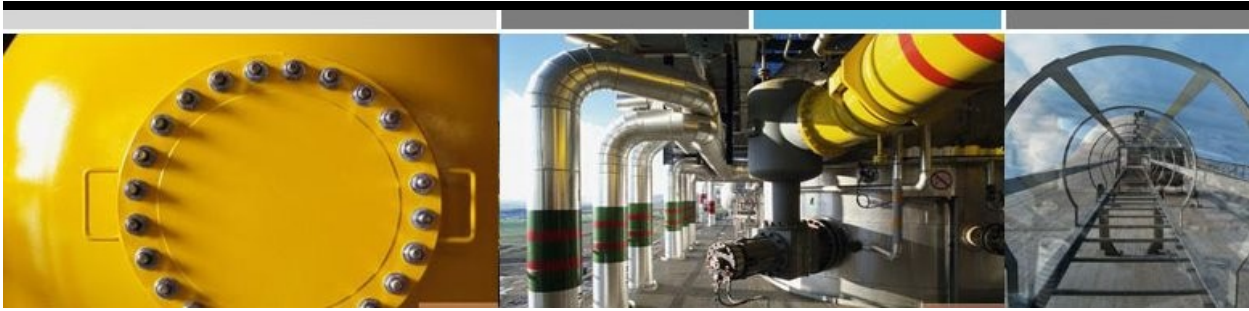

Process controls systems challenges require responsive and innovative strategic assessments. Solutions must be uniquely suited to each individual client's requirements and business model. INTEGRITY's multi-industry process experience allows its personnel to provide customized solutions by leveraging this shared expertise. Our strengths include:

- **Mandating value for every project phase** — At INTEGRITY, we work with you to provide a detailed scope, schedule, and project estimate for your controls needs. Our expertise does not stop at the plant floor, but continues integrating with your enterprise systems.
- **Minimizing risk** — INTEGRITY combines proven, leading practices and extensive industry experience with a thorough investigation of your existing knowledge base and specific business requirements to assure timely delivery of a complete solution.
- **Formalized project execution methodology** — Our Project Management Institute(PMI) PMBOK-based project execution methodology, combined with our experienced project teams, delivers a proven, quality stringent compliance with client specifications, schedule and budget for single- or multi-site technology rollouts.
- **Making the correct technology choices** — Vendor and platform independence allows INTEGRITY to determine and apply the best solution for both your immediate and long-term needs. We seek to provide and specify equipment/technology that fits each individual client's business and technology model.

Process Instrument/Controls Systems Solutions

Markets Served

- Renewable Energy
- Utility & Independent Power
- Oil and Gas
- Refining
- Industrial Manufacturing
- Specialty Chemical
- Pulp and Paper
- Automotive
- Metals, Mining, Minerals
- Water/Wastewater

Core Competencies

- Project Definitions
- Front End Engineering Design
- Project Execution/Management
- Business Needs Assessment & ROI Analysis
- Instrument/Controls Design
- Control System & Network Validation
- Construction Management
- System Commissioning - Check-Out & Start-up
- Turnkey Projects
- Main Automation Contractor (MAC)

Service Areas

- Project Management
- Control System Implementation
- System Design/Programming
- Electrical Design
- DCS Configuration
- PLC Programming
- Advanced Process Control
- Instrument Design
- HMI Configuration
- Safety & Instrumented Systems

INTEGRITY Engineers commitment to delivering measurable results by effectively leveraging its proven methodologies and entrenched domain expertise improves client business performance throughout the enterprise.
